„Inspired by the need of beauty”

CATALOGUE OF BEAUTY PRODUCTS

Manufacturer: PPHU KEJ Sp. z o. o. | www.kej.pl | www.sklep.kej.pl
Natural KEJ essential oils are liquid and very condensed volatile fragrant substances obtained from plant materials through steam distillation of twigs, blossoms, leaves, herbs and seeds, or through pressing citrus fruit peel. Properly selected and applied essential oils are widely used in cosmetics and the perfume industry as a replacement for chemical agents. When used in beauty products, they not only provide them with a wonderful and natural fragrance but, above all else, they nurture and improve health and beauty.

The most common applications of essential oils include:

- **BATHS**
  It is enough to add a few essential oil drops to warm water.

- **HAIR CARE**
  Normal hair, dry hair, oily hair.

- **MASSAGING**
  A few drops of the essential oil of choice should be mixed with a tablespoon of a base oil (e.g. argan, jojoba or sundrop oil).

- **SKIN CARE**
  Normal skin, oily skin, skin blemishes, dry skin.
100% NATURAL KEJ ANISE ESSENTIAL OIL

Known for its intense sweet and spicy aroma, anise oil is obtained from dried ripe anise fruit through steam distillation. An intense top and middle note.

*naturally occurring in the raw material

Properties:
- used in perfume industry as the dominant note of oriental, chypre and fougere scent compositions,
- used in cosmetics industry for perfuming soaps and cosmetics,
- alleviates skin blemishes,
- astringent and toning,
- recommended for oily skin and skin prone to acne,
- reduces cellulite,
- improves skin firmness and regenerates skin after quick weight loss,
- reduces the risk of scar formation,
- improves the conditions of skin and dry hair,
- is a natural sweat reducing and deodorising agent,
- goes well with sage, geranium, lavender, tea tree, lemon, cedar, juniper and pine oil.

Contraindications:
It has a very strong effect. Do not use more than 2 drops per procedure.
FRAGRANCE OILS

Stimulate your senses

What we call fragrance oil is a composition consisting of pure chemical compounds of a natural origin. These oils have very complex scent notes. The final scent obtained results from combining several properly selected ingredients.

Advantages of using fragrance oils:
- provide an alternative for people sensitive to application of essential oils,
- provide a beautiful scent whilst bathing,
- excellent as a fragrant addition to cosmetics or a relaxing massage.

Typical application of fragrance oils:

- **BATHS**
- **MASSAGES**
- **COSMETICS**
BERGAMOT FRAGRANCE OIL

An oil with citrus scent (known from Earl Grey tea). Fresh, energising and refreshing.

**INCI ingredients:**

Parfum, Limonene*, Linalool*, Citral, Citronellol, Geraniol, Farnesol

**Properties:**
- refreshes skin when used in the bath,
- perfect for perfuming self-made cosmetics such as creams, soaps, bath bombs and salts, candles or balms,
- can be a substitute for essential oil,
- its citrus scent is used as deodorant,
- eliminates unpleasant odours,
- goes well with a lemon or cedar scent.

**Contraindications:** Do not use on children.

ROSE FRAGRANCE OIL

An oil with sweet floral perfume scent. It is very romantic and feminine, can be light and refreshing (when combined with the green family of scents: bergamot, lavender, patchouli, rosemary, sage) or sensual and gentle (when combined with an oriental family of scents: cinnamon, clove, patchouli).

**INCI ingredients:**

Parfum, Geraniol, Citronellol, Cinnamyl Alkohol, Benzyl Benzoate, Citral, Cinnamal, Limonene*, Linalool*, Benzyl Alcohol

**Properties:**
- in the cosmetics industry, it is added to balms, creams, bath liquids and candles,
- masseurs use it for face massages (it is enough to apply a small drop and spread it with slow and smooth movements. The oil is absorbed within about a minute).
- adding just a few drops makes a bath an extraordinarily fragrant experience,
- can be a substitute for essential oil.

**Contraindications:** Do not use on children.

YLANG-YLANG FRAGRANCE OIL

An oil with a sweet, sensual and oriental floral scent.

**INCI ingredients:**

Parfum, Linalool*, Geraniol, Eugenol, Citronellol, Benzyl Benzoate, Benzyl Salicylate, Farnesol, Limonene*, Benzyl Alcohol, Citral

**Properties:**
- perfect for perfuming self-made cosmetics such as creams, soaps, lotions, bath bombs and salts, candles or balms,
- can be a substitute for essential oil,
- a bath with a few drops of ylang-ylang oil provides the skin with a stunning scent,
- it goes well with citrus oils (orange, bergamot, lemon, and grapefruit). In chypre compositions it accompanies the scents of lavender, geranium clove, rose and cedar.

**Contraindications:** Do not use on children.
Cosmetic oils are cold-pressed, unrefined, 100% natural oils providing skin, hair and nails with comprehensive care.

Cosmetic oils are one of the most valuable gifts of nature and the most important raw material in the cosmetics industry. They can be used as one of the basic ingredients for the production of many cosmetics such as balms, creams, make-up removal lotions and hair conditioners as well as for individual use on the skin of the whole body, hair and nails.

Cosmetic plant oils play an increasingly important role in the cosmetics industry. When spread on the skin, they form a so-called occlusion layer i.e. a thin film preventing skin dehydration. They are characterised by good absorption; thanks to which they provide the deeper skin layers with valuable nutrients such as essential unsaturated fatty acids, vitamins (A, D, E, and K), phospholipids and phytosterols.
The secret of healthy, beautiful and glowing skin lies in natural nurturing oils. Thanks to their components, the skin becomes wonderfully soft, smooth and firm. Natural cosmetic oils can be used successfully for all purposes. The face and hair oils available in what we offer ensure a healthy and beautiful appearance without the risk of irritations and allergies.

**ADVANTAGES OF USING:**

- versatile products used for whole body care,
- can be used directly on the skin as a ready-to-use cosmetic product,
- a perfect base oil for massage,
- perfect as a raw material for the production of home-made natural cosmetics,
- thanks to cold-pressing, they contain a much wider array of temperature-sensitive substances beneficial to the skin,
- fully natural cosmetic oils are perfect for all complexion types (even sensitive and atopic),
- minimum risk of irritation,
- profound nourishment and improved elasticity of the skin.

For external use.
ORGANIC ODOURLESS ARGAN OIL 50 ML

*Argania Spinosa Kernel Oil*

**Cosmetic effects:**
- moisturises and nourishes,
- skin becomes smoother and more elastic,
- anti-aging,
- protects skin against the harmful impact of external factors,
- nourishes hair and makes it shiny,
- strengthens brittle and fragile nails,
- recommended for all skin types.

ORGANIC GOLD JOJOBA OIL 50 ML

*Simmondsia Chinensis Seed Oil*

**Cosmetic effects:**
- moisturising, smoothing and regenerating,
- skin becomes softer and more elastic,
- protects skin against the harmful impact of external factors,
- strengthens and nourishes both hair and nails and also make them shiny,
- recommended for all skin types.

ORGANIC SUNDROP OIL 50 ML

*Oenothera Biennis Oil*

**Cosmetic effects:**
- moisturising, nourishing and smoothing,
- skin becomes softer and more elastic,
- rejuvenates and regenerates the skin,
- has impact on balancing sebaceous gland functioning,
- strengthens hair and nails by improving their condition,
- recommended for all skin types.
Hydrolates are water from plants formed as a by-product of essential oil extraction through steam distillation of whole plants or parts thereof. Hydrolates have some of the beneficial properties for the essential oil of which they are a by-product. They can be used on their own as a tonic or as an additive to masks (e.g. clay masks, algae masks, creams and balms). Natural floral waters have a toning and refreshing effect on the skin and restore its correct pH value.

Hydrolates perfectly complement everyday care as well as cosmetic procedures such as cleaning, make-up removal, peeling or mask application. Depending on their properties, hydrolates can be selected with complexion type and skin problems in mind.

ADVANTAGES OF USING:

- excellent moisturising of skin and hair,
- soothing,
- reduces skin imperfections,
- radiant glowing skin,
- stronger and healthier hair,
- well-absorbed and does not leave a sticky film on the skin.
- immediate refreshment,
- as a tonic it prepares the skin very well for further care,
- leaves a pleasant and subtle scent on skin and hair,
- balances skin colour and reduces discolorations.

For external use.
HYDROLATES

BITTER ORANGE BLOSSOM HYDROLYTE 100 ML

INCI ingredients:
Citrus Aurantium Amara Flower Water, Geraniol*, Limonene*, Linalool*  
*naturally occurring in the raw material

Cosmetic effects:
- refreshing and toning,
- has a soothing effect on skin blemishes,

- it leaves a pleasant and subtle scent on skin and hair,
- well-absorbed and does not leave a sticky film on the skin,
- excellent for everyday care of sensitive, couperose, dry and mature skin.
The oils of the KÉJ company are intended for everyday skin care. Each of them is a mixture of plant oils, vitamin E and a unique combination of essential oils. The sweet almond oil, argan oil and jojoba oil they contain make it easier to apply the product while, at the same time, moisturising and nourishing the skin.

Vitamin E, a strong antioxidant, removes free radicals responsible for the skin aging process. Additionally, it protects body oil against microbial growth; thanks to which our products are free of preservatives.

Pleasant scents are composed of natural essential oils that have a positive impact on our sense of well-being. These oils contain only natural ingredients that facilitate the absorption of essential oils into deeper skin layers thus ensuring their appropriate effect.
- nourish the skin, while at the same time increasing its elasticity, smoothness and firmness,
- improve skin colour,
- stimulate the removal of toxins from the body,
- balance the functioning of sebaceous glands,
- relax tense muscles,
- reduce mental stress,
- improve mood.

For external use.
