ASPINOSEK NASAL ASPIRATOR

The ASPINOSEK nasal aspirator is a medical device dedicated for children, especially the youngest ones. In the first year of life, infants cannot breathe through their mouths, which is why a blocked nose is really difficult for them. Mucus, which they cannot blow out on their own, makes it difficult for them to breathe freely, eat food or sleep well. Moreover, it can cause numerous complications, for example: sinusitis, otitis media, laryngitis, tracheitis, bronchitis and even pneumonia.

ASPINOSEK is convenient and very easy to use. The aspirator cleans the baby’s nose in a safe and thorough way from the mucus remaining in it, thus restoring the comfort of breathing. A disposable filter, placed in the nozzle, stops the sucked up mucus and ensures the procedure is hygienic.

The product has a CE marking

The product is recommended by the „Aby żyć” foundation.

Aspinosek consists of the following elements:
- mouthpiece
- tubing
- body
- 3 nasal nozzles with a disposable filter

DISPOSABLE FILTERS FOR THE ASPINOSEK NASAL ASPIRATOR X12 PCS

Disposable filters are interchangeable accessories for the ASPINOSEK nasal aspirator. They are delivered in a small, handy, 3-chamber box that makes them easy to store. 12 pieces in a pack.

The product has a CE marking

**INHALERS**

Inhalers from the Bronchiol group are devices supporting treatment of respiratory diseases at home.

---

**BRONCHIOL 2-SPACER SYSTEM INHALER - NEBULIZER**

It is a simple to use medical device, supporting treatment of chronic respiratory diseases at home. This device, depending on the elements used, has a dual function, fulfilling the role of a nebulizer or a spacer.

THE SET INCLUDES THE FOLLOWING ELEMENTS:

- nebulizer cup
- outer chamber
- inner chamber
- elbow joint
- nebulizer
- universal mask (for children and adults)
- nasal nozzle
- mouthpiece
- bulb aspirator
- tubing

Bronchiol System 2-Spacer is a universal inhalation chamber (for children and adults), facilitating the use of medications in the form of inhaled aerosols under pressure. It can be used with pressure inhalers containing inhaled glucocorticoids and short-acting beta2-agonists (mainly during periods of aggravation). The product is suitable, among others, for the following pressure inhalers: ATROVENT N, BECLOMETASON, BERODUAL, FLIXOTIDE, SALBUTAMOL, SEREVENT

**ATTENTION:**

- Dosage and choosing medications can only be performed by a qualified medical professional!
- The nebulizer shouldn't be filled with essential oils, substances or medicines containing them, as they cause its permanent damage!

The product has a CE marking
**BRONCHIOL FORTE INHALER**

A simple to use medical device for home use. It is used for mild inhalations with the use of natural essential oils registered as medicinal products, inhalation salts, herbs and other agents that help with breathing or are used for skincare.

It can be used by adults and children over the age of 3 (under control of an adult) to relieve colds, sinus diseases, as well as chronic throat and nasopharynx inflammations. Supports the prevention of upper respiratory tract diseases and helps people suffering from allergies. It can also be used for aromatherapy.

**THE SET INCLUDES THE FOLLOWING ELEMENTS:**
- cup
- outer chamber
- inner chamber
- sauna
- universal mask
- nasal nozzle
- mouthpiece
- bulb aspirator
- perforated tubing with a stopper
- elbow joint

Different combinations of the elements result in various possibilities of using the product and allow to adapt it to individual needs.

The product has a **CE** marking

---

**BRONCHIOL PISTON INHALER**

A medical device for domestic use. It is used for effective delivery to the airways of medication and saline prescribed by a doctor. The compressed air created in the compressor is delivered via an air duct to the nebuliser (medicine chamber). In the nebulizer, compressed air is transformed into an aerosol mist, which is delivered directly to the respiratory tract through a mouthpiece or a mask. The inhaler supports the treatment of asthma, allergies and other respiratory diseases.

Prescribing medications, their dosage and times of use per day can only be performed by a qualified medical professional.

**Attention:** The nebulizer shouldn't be filled with essential oils, as they cause its permanent damage!

**THE SET INCLUDES THE FOLLOWING ELEMENTS:**
- compressor
- air duct
- nebulizer
- mask for adults
- mask for children
- mouthpiece
- air filters - 5 pcs

The product has a **CE** marking
